

CHAIRMAN'S MESSAGE

Dear Shareowners,

I wish to present to you the Sixty-Fourth Annual Report and accounts for the year ended March 2014.

The year under review has been yet another challenging one both on market front and the finance front. The silver lining of our own branded products which showed consistent growth up to September-2013 and got throttled due to constraint of finance. We reverted back from the system of verticals to customer focused regional system at the beginning of April -2012. It considerably helped to reduce the costs which were badly needed. Thereafter, during last 12 months we have further streamlined our establishment by reducing the stocking location but keeping the contact points for marketing. The overall slowdown of economy and higher finance costs continue to add to our losses, like many others. In my statement last year, I had mentioned that "The coming year does not show any promise of improvement in this area". Unfortunately, it has come true. With last sixty two years of wide experience of distribution and marketing, the market has given a good response to our products. We would have done still better had we got financial support from the concerned quarters.

Solar business all over the world is facing recession and severe competition. We are no exception in our subsidiaries engaged in manufacturing solar P.V. panels and system integration business. Shurjo Energy Pvt. Ltd. had to suspend manufacturing operations whereas PAE Renewables considerably improved its top line from ₹ 1.34 Crores to ₹ 4.93 Crores and improved from the loss of ₹ 53 Lakhs to profit before tax of ₹ 16 Lakhs. We are looking forward for better performance in this business. Similarly, our 1 MW projects in Rajasthan and Punjab are running satisfactorily and are generating power. Both the DISCOMS are paying the monthly bills regularly for power supplied to them from our projects.

In order to solve financial difficulties, the promoters have tried to get financial support from outside party but due to various difficulties, could not obtain any loan therefore the promoters including promoter group entities, themselves have contributed to the extent of ₹ 6.93 Crores by way of ICD and FD.

The financial year ending March 2015 is not necessarily expected to be great, although some improvement should take place in light of the new Government coming in position with greater stability and hopefully faster decisions. Even the overall industry forecast says that there will be slight increment in Q4, after recovering from bad situation in the past. Therefore, our company also be in the same line of performance. However, the management is striving to improve the efficiency, reduce the costs, to achieve some profitability.

Regards

Arvind R. Doshi

MANAGEMENT DISCUSSION & ANALYSIS

During the year 2013-14 the management has further optimized the Branch operations by Warehouse Consolidation.

❖ Benefits of Warehouse Consolidation:

- Lower Shipment Costs.
- No Capital Investment done.
- Lower Inventory Level.

This has indeed helped your company face the current economic scenario.

❖ Infrastructure:

- Each state now has one centralized warehouse.
- The sales and service offices are retained in all the locations by giving more thrust towards better coverage of the sales team and just in time service support.

❖ Mobile Application:

Mobile application (TBS Mobile) played key role in the restructuring process.

- Order to invoice automated process.
- Minimum Manual Intervention.
- Order to Dispatch Tracking.
- On time Inventory.
- Customer Management.
- Travel Management.

The sales team is provided with our **TBS Mobile Application** which allows the team to conduct effective ordering and payment updating, while they are in the field with distributors and customers. The sales team is now fully market centric.

The company is now on a firm footing in expanding the battery business since full range of batteries are made available to the market. The distribution channel is very much active and the promotional activities to develop the secondary sales are underway. Going forward, detailed plans of a dedicated drive to increase the distributors pan India basis is worked out. With the consolidation of warehouse and successful implementation of mobile application the company is now envisaging increasing the sales force in the rural market to tap the growing tractor and inverter market.

❖ Power

With the strength of last four decades marketing and distribution experience in Automotive and Industrial Batteries, your Company's new brand of batteries "ZENIDE" has now gained momentum since the acceptability have now increased and the confidence has been rebuilt by persistent market penetration during the year 2013-14.

Despite the current challenges in economic scenario, we are confident more than ever that our business in this segment will improve systematically and will become

more active and will turnaround when the economy rebounds.

Our Power vertical consists of major segments as below.

➤ **Automotive Batteries**

The Aftermarket Business of Four wheeler and Two Wheeler

Initiatives:

During the year 2013-14 our marketing team spent more time on largely enhancing the network and increasing the visibility of our brand. We now have a fairly active network of distributors. The distributors have also enlarged their base with the appointment of dealers and mechanics under them with our support.

We will further grow in this business since we have the budget in place to increase the network of distributors by another 150 nos and dealers under them by another 450 nos during the year 14-15. Our visibility is now effectively noticed in the tier-1 cities with our dealer boards and wall painting and innovative campaigns and Zenide occupying shelf space. The regular contacts with the workshops and electricians are adding value to the secondary sales. For 2014-15, we have ambitious plans to appoint dealers in tier-2 cities and rural areas for marketing tractor batteries.

The sale of 2 wheeler vehicles are growing very fast in India. India is currently the second largest two wheeler market in the world. During 2013-14 we have added full range of motor cycle batteries in VRLA segment for the new generation vehicles. The quality and the cosmetics are well accepted by the dealers and customers and we foresee quantum jump in sales.

➤ **Industrial Batteries**

• **Inverter Tubular Batteries:**

During the year 2013-14, though we had limitations in fulfilling the supply chain for the Inverter tubular batteries, it gives us confidence that our order booking has increased considerably.

• **UPS VRLA Batteries:**

We have started bagging bulk orders in the UPS VRLA batteries segment. As per the plan in the year 2013-14 we have now obtained test certificates from reputed testing lab from Ahmedabad which will now help the team to quote for big installations.

• **C10 Tubular Batteries for Solar Application:**

With the growing demand in this segment your company is now geared up with the complete range of batteries with 60 Months warranty to the customers. The batteries are also under testing for MNRE approval at National Institute of Solar Energy (NISE) in Gurgaon.

❖ **Institutional Business:**

A new team is formed to concentrate in the Institutional Business with the Key Customers Pan India, who will

target all the fleet/travel/logistics operators apart from the small and medium generator and UPS manufacturers. This will also enable your company to grow in the revenue.

❖ **Export:**

The Company has been getting good enquiries and is confident of bringing Export Revenue starting from 2014-15.

➤ **Power Back-up Systems:**

Company continues to make headway in getting prestigious orders in this segment in our Brand of **Power Zen** power back up systems. This only speaks the topmost quality of the products and also the services offered to the customers. Depending on the type of application, PAE/PAER (PAE Renewables Pvt. Ltd.) designs the system custom made, sells to channel partners and end users. PAER also provides a comprehensive range of installation, commissioning and annual maintenance services to the end customers. During the year 2013-14 the company obtained competitive pricing from the vendors which resulted in bagging the orders in this highly price competitive market.

No doubt, Government is making all out efforts to ensure the supply of power to Agriculture, Industries and domestic. We are also aware that there is a wide gap between the demand and supply. Hence the dependence on the Power backup devices will continue.

There was acute shortage of power in many parts of India and the Battery Industry is reaping big benefits with their top line is increasing. There is big increase in the purchase of Inverters/UPS/Batteries in households to make sure their kids gets uninterrupted supply of power for the studies and comfort. Earlier this was purely a status symbol but now this has become a necessity. The usage of UPS/Batteries is growing due to various applications such as lifts / Hospital Equipment's / Computer etc.

❖ **Strengths and Opportunities:**

- Your company has now established full range of batteries in a short time with Pan India Distributors and Dealers.
- The Company has grown in numbers. We have crossed a sale of one Lakh units of automotive batteries and one lakh units of two wheeler batteries. With the plan for increasing the visibility and also investment in branding the sales is definitely going to go up.
- Zenide is now a registered brand. The discerning dealers and customers are making this as a strong choice.
- The Consolidation of warehouse and implementation of Mobile application has now enabled your company to become lean and will leverage to expand the sales team.
- The Organized Sector battery industry is growing and because of the strong reputation of your company in the Automobile industry there will more and more channel partners joining us to make Zenide their favorite brand.

- Experienced Marketing Team with wide knowledge of Battery business, product launches, market contacts and fast decision making.
- Extensive network of 34 sales and service offices throughout the country with battery charging/checking.
- The unprecedented sales of new cars during the year 2010-11, continue to help the industry to grow in percentage and this will be highest in the year 2014-15 as all the batteries life will end by then.
- With the Computer education reaching the rural areas, the banks on their target on expansion of branches/ATMs there will be much demand of UPS and UPS batteries.
- The battery management rule continues to be strict with the wide awareness of the disposal of used battery through proper mechanism by pollution control board. By the fear of legal actions and penalty becoming very rigid there is a big shift of rebuilders opting for promoting organized sector batteries. This will also help your company to get further share.

❖ **Threats and Weaknesses:**

- Inverter Tubular and Flat plate battery segment is largely seasonality driven and is unpredictable.
- The fluctuation lead price will change the market dynamics.
- The change in Govt policies in duties, Taxes and import regulations will be a big challenge.
- Any downward pricing and high velocity schemes to the market by Industry leaders will directly hit our bottom line to stay competitive.

As at March 31, 2014, the accumulated losses in SEPL have exceeded its net worth by ₹ 309.58 lacs. The Company is actively pursuing the revival of its subsidiary *Shurjo Energy Pvt. Ltd. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entities internal control.
